EXPERIENCE

Mindsera / Product Engineer

Feb 2026 - Present

AI journaling for mental wellbeing, serving tens of thousands of active users.

- Own features with the CTO and founder, from Figma designs through development, release and analytics.
- Built AI voice conversations and processing pipelines connecting speech recognition, relevant journal history and spoken AI responses.
- Delivered smartwatch recording, widgets, imports, payments and health integrations; improved onboarding, reminders, retention analytics and AI response quality.

Legal-tech (via Contra) / Full Stack Developer, freelance

Jul 2025 - Sep 2025

- Built AWS Lambda pipelines to extract bank-statement data; integrated three AI models to analyze transactions and connect findings to legal cases.
- Developed AI chat, financial visualizations and dashboards using TypeScript and Python.

BluIP Inc. / Full Stack Developer

Feb 2025 - Jul 2025

- Improved AIVA Connect's AI calls and chats, helping cut human intervention from ~50% to under 8%.
- Onboarded 5+ enterprise clients; built CRM, reservation and ticketing integrations, and improved the agent console, analytics and backend reliability with TypeScript and NestJS.

THE G.A.I.A / Freelance Full Stack Developer

Dec 2024 - Feb 2025

- Built a responsive restaurant menu dashboard with Next.js and React, including real-time updates, drag-and-drop reordering and quick editing.

INDEPENDENT PRODUCTS

NoteCal AI / Founder

Since 2025

Built an iOS food tracker that turns plain-language meal notes into calorie and macro estimates, with editable portions. SwiftUI, Next.js and AI integrations.

ChrossX / Co-Founder

Since 2024

Built a lightweight PC crosshair overlay: **40,000+ downloads in its first month** and **500+ daily active users**. Took it from a free tool to a paid product with a team of two.

Weylo / Founder

Since 2025

Built a Romanian wedding supplier marketplace; onboarded dozens of suppliers through the platform dashboard. Added portfolios, price comparisons, reviews and paid promotion.

Evenimente Creștine / Founder

Since 2024

Built a go-to platform for Christian events in Romania, partnering with major organizers within its first months. Event discovery, publishing and promotion.

SKILLS & TOOLS

AI engineering: Agents, memory, tool calling, MCP, RAG, semantic search, embeddings, voice pipelines

AI tools: OpenAI, Claude, Gemini, Vercel AI SDK, LangChain, LangGraph, LlamaIndex, LiveKit

Languages: TypeScript, JavaScript, Python, Swift, SQL, HTML, CSS

Web & mobile: React, Next.js, Remix, Node.js, NestJS, FastAPI, React Native, Expo, SwiftUI

Data & delivery: PostgreSQL, MongoDB, Redis, AWS, Supabase, Firebase, Convex, Vercel, Cloudflare

Product: Figma, PostHog, Langfuse, Stripe, RevenueCat, StoreKit
